

Planner Rebuild Procedure

Please note that this procedure will stop any recordings currently in progress - if you're currently recording a programme, you may wish to wait until it's finished before continuing.

Planner Rebuild Procedure

1. Press **services** on your Sky+HD remote control, then select **System Setup**.
2. Press (number) **0**, then **1**, then **select** to access the **Installer Menu**.
3. Highlight **Sky+ Planner Rebuild** and press **select**.

Planner Rebuild Procedure in the new Sky+HD Guide

1. Press **services** on your Sky+HD remote control, then select **Settings**.
2. Press (number) **0**, then **1**, then **select**.
3. Highlight **Sky+ Planner Rebuild** and press **select**.

Your Sky+HD box will show this warning message, "This will take a few minutes to complete. The rebuild will stop all recordings and reboot your Sky+. Press select to continue or backup to stop."

Press **select** to continue and you should see the "Housekeeping please wait" message. It can take up to two minutes for the housekeeping message to disappear.

Your Sky+HD box will then carry out the procedure, switch itself off and then switch itself back on automatically and wait in standby mode.

When the red light appears, wait for 2 minutes 30 seconds before continuing to watch Sky.
